Status Update & 4Q27 Goals

STATUS UPDATE

THE WASHER/DRYER PROGRAM

—

The washer/dryer program is active; 12 installations were completed this quarter.

THE POOL GATE REPAIR

—

Quarter-end operating update The pool gate repair was completed on 2027-09-30 for \$4,200.

THE REMAINING CLUBHOUSE ACCESS RAMP

—

The remaining clubhouse access ramp is due 2027-11-30.

3Q27 collections recovered: — · bad debt write-offs: —

4Q27 GOALS / INITIATIVES

OCCUPANCY

—

Reach 95% physical occupancy.

RENEWALS

—

target renewal increases of 2% to 4%.

PROJECT DELIVERY

—

finish the access ramp by its stated deadline.

Source Files & Extraction Method

Every figure in this report is traced to the file and line it was read from, on the data-sources sheet that follows its page. This page lists the files behind all of them. Figures printed as — were in none of the files supplied for this period; the reason is stated against each one. Values marked

OCR

 were recovered from a scanned page by vision OCR rather than read from machine-readable text, and warrant a closer look.

SOURCE FILES CONSOLIDATED INTO THIS REPORT

6 FILES

File	Recognised as	Text extraction
activity_06.pdf	Slate capital calls; Slate distributions	Machine-readable text
attachment_773.xlsx	HelloData unit-level listings; CoStar submarket data table; Rent trend chart workbook; HelloData comp set summary	Machine-readable text
briefing_24.pdf	Asset management memorandum	Machine-readable text
download_019.xlsx	Yardi Lease Trade-Out (renewals / move-ins); Yardi Rent Roll summary (occupancy); Yardi Market Rent Schedule (rent by unit type)	Machine-readable text
export_482.xlsx	Yardi Budget Comparison (P&L and capital); Yardi Balance Sheet; Capital project register; Original underwriting plan	Machine-readable text
record_71.pdf	Loan servicing summary	Machine-readable text

How to Read These Working Papers

Each data-sources sheet states, for every figure on the page before it, how that figure was obtained. This page defines the six markers it uses and the arithmetic conventions applied throughout the report.

HOW WE GOT IT

THE SIX MARKERS USED ON EVERY DATA-SOURCES SHEET

● Extracted	Read directly from a supplied file. The sheet names the file, the worksheet or page, the row, and quotes the source line it was read from.
○ Extracted by OCR	The page carried no machine-readable text, so it was transcribed from an image by vision OCR before being read. Transcription confidence is stated. These warrant a closer look than the rest.
● Calculated	Derived from other figures in this report. The sheet gives the formula in full, with each input value and the file and row it came from.
● Entered by reviewer	Typed on the review screen, either because no file carried it or because the extracted value was corrected.
● AI-written	Narrative prose drafted from the figures above it, for a reviewer to check. No number is ever produced this way.
● Not found	In none of the files supplied for this period. The sheet names the document that would ordinarily carry it. Nothing is estimated or inferred to fill the gap.

CALCULATION CONVENTIONS

APPLIED TO EVERY CALCULATED FIGURE

Precision	Every calculation runs at full precision on the extracted values and is rounded once, for display only. An intermediate result is never rounded and fed into the next step.
Rounding	Half away from zero: 1,424.5 prints as 1,425 and -162.5 as -163. This is the convention of financial statements and of Excel's ROUND, rather than the half-to-even default of most programming languages.
Percentage change	Divided by the prior-period value, never by the current one.
Variance	Actual less budget. On expense lines the sign is inverted so that a favourable result reads positive; the data-sources sheet says so against each line it applies to.
Reading a difference	Because operands are rounded for display only, a printed difference can differ by one unit from subtracting the two printed figures. Where they differ, the printed difference is the more accurate of the two.
